Farmer grow crops not just for his family but for the families of our country

Agriculture is the major source of occupation and significant contributor in the Indian economy

To produce high yields the new strains required chemical fertilizers,pesticides,and irrigation

Biotechnology and tissue culture with hybridisation have provided farmers with many good varieties of crops

Title: India's agriculture crop production analysis

Agriculture is the cultivation of animals,plants and some other organisms such as fungi,for the production of food,fibre,fuel,and medicines used by the society

Crops withering under record high temperature s,cycles of drought and extreme rainfall and pest infestations

The goal is to improve the working condition and productivity while avoiding production loses due to bad climate condition

Agriculture is the wisest pursuit because it will in the end contribute most to real wealth,good,morals and happiness

Does

What behavior have we observed?  
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?  
What other feelings might influence their behavior?
